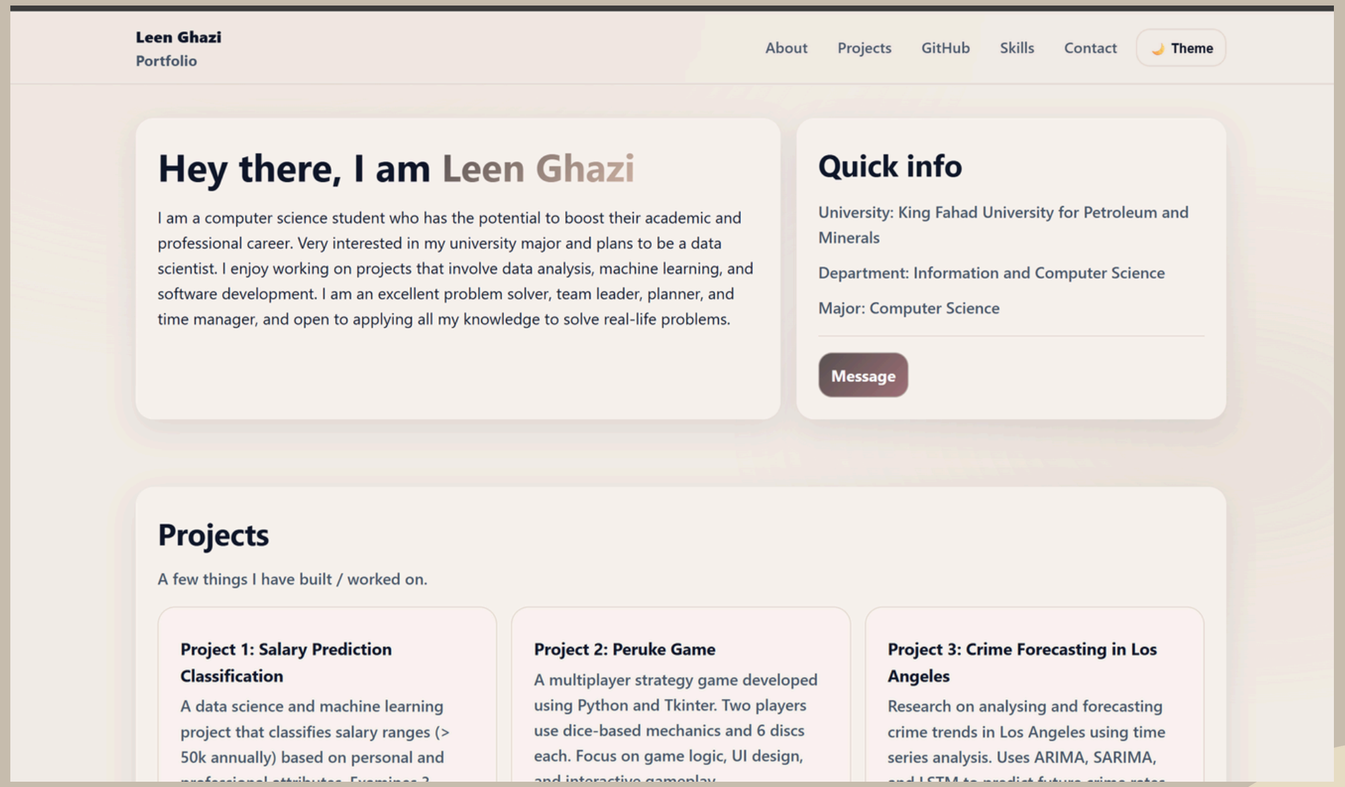
PERSONAL PORTFOLIO

By Leen Ghazi

INTRODUCTION

- Personal Portfolio Web Application (Overview, Academic Projects, GitHub Repositories, Skills, Contact Form).
- Built Using HTNL, CSS, and JavaScript
- Professional and a user-friendly interactivity tool to reflect my growth and experience through my academic journey.

WEBSITE DEMO



TECHINCALITYS

MOST CHALLENGING ASPECTS

- Designing a responsive layout & maintain a clean code structure
- GitHub API
- Complex UI transitions
- Advanced backend integration for the contact form

INNOVATIVE SOLUTIONS IMPLEMENTED

- Using local storage:
  - Dark/Light Mode
  - Greeting message
- Dynamic Project Display / Organization (sorting, filtering,..)
- User Feedback System

LESSON LEARNED?

- Debugging
- CSS design requires attention to details
- Create a Structure before coding
- How to correctly integrate AI into my project

CONCLUSION

- Built a fully functional and responsive portfolio website.
- Enhance backend field for the contact form submission
- Build an internal interactive tool for myself to add/edit/delete my projects and display them on my personal portfolio

THANK YOU
